

Even the new installation by atelier oi – inspired by Japanese craftsmanship of paper – will surprise the visitors

Further formforum Schweiz will be presenting at the ABB Hall a selection of outstanding products developed in its members' think-tanks and workshops. At "neue räume 15", the forum will show projects involving furniture design, product design, ceramics, textile design, paper, jewellery, metal, glass and wood. formforum is committed to promoting contemporary and experimental design. Its members are supported in their activities, in furthering their design skills and innovative ideas, as well as in developing their entrepreneurial abilities. Through collaboration projects – like, for example, with "neue räume" – the association also raises its members' public profile. The largest association of Swiss interior architects, VSI/ASAI, will be present for the entire duration of the neue räume trade fair to provide information and consultancy. With its members' expert knowledge and experience, VSI wants to facilitate decision-making and open up new perspectives on architectural projects, redevelopment projects and interior design questions. For personal consultations with professional interior architects, it is recommended that you bring relevant documentation, like building plans and sketches.
